Ezequiel Bellino

Perfil

Software Developer with a solid foundation in Python, JavaScript, React, Flask, and more, supported by previous experience in electrical and systems maintenance, that has provided me with strong skills in diagnosing and solving hardware and software problems in critical environments. Accustomed to collaborating with multidisciplinary teams, I combine logical thinking and clear communication to translate business requirements into robust and maintainable solutions. My profile blends technical precision with a service-oriented approach, enabling fast troubleshooting, process optimization, and empathy when supporting users and clients.

Skills

JavaScript • Python • ReactJS • HTML • CSS • Flask • SQL • Bootstrap • Github • Git • Jest • PyTest • JWT (Json Web Token) • PostgreSQL

Projects

SchoolHub, *JavaScript, React, Flask, PostgreSQL*

Developed a platform for schools to manage academic processes, roles, and communication between administrators, teachers, and parents, improving collaboration and student follow-up.

- Designed and implemented user role management (Admin, Teachers, Parents) to ensure secure and tailored access across the platform.
- Developed and maintained academic reporting features, enabling scheduling for teachers and tracking of student grades and attendance.
- Facilitated communication flows between administrators, teachers, and parents, enhancing collaboration and student progress monitoring.

MEySLH, *Python, CustomTkinter*

Developed a tool to simplify system maintenance tasks by automating diagnostics and file searches, improving efficiency and accessibility for day-to-day operations.

- Built and deployed a Python-based solution that streamlined access to system characteristics for faster PC diagnostics.
- Automated the search and retrieval of critical files, significantly reducing manual effort and time required for maintenance tasks.
- Applied problem-solving and process optimization skills to create a practical solution that supported internal operations.

Education

Full Stack Software Developer, *4Geeks Academy* 08/2024 – 12/2024 | Remote

Certificates

EF SET
English Certificate

Introduction to Terminal and Command Line
Platzi Academy

Professional Git & Github Course
Platzi Academy

FastAPI: Path Operations, Validation, and Authentication
Platzi Academy

Python Fundamental
Platzi Academy

Python: Comprehensions, Functions, and Error Handling
Platzi Academy

FastAPI: Databases, Modularization, and Deployment to Production
Platzi Academy

Professional Experience

Electrical & Systems Maintenance, *AUBASA* 2015 – Present

Languages

Spanish — Native • **English** — Intermediate B1
